CompTIA Security+ | Active DoD Secret Clearance

PROFESSIONAL PROFILE

IT systems and operations professional with 5+ years of experience supporting end users, endpoints, infrastructure, and business-critical technology across Amazon operations, multi-site retail, and U.S. Air Force medical environments. Hands-on background in Windows, Active Directory and Group Policy, endpoint imaging and deployment, ITSM, asset lifecycle, networking, automation, documentation, and security/compliance. Combines technical troubleshooting with operational ownership, process improvement, and clear support for users and teams.

300+ ENDPOINTS **150+ SYSTEMS DEPLOYED** **1,000+ L2 TICKETS/YR** **500+ RETAIL TICKETS**

CORE EXPERTISE

Systems & Identity:	Windows, Windows Server, Active Directory/AD DS, Group Policy, RSAT, Microsoft 365, user provisioning/offboarding, print server administration
Endpoint & Infrastructure:	SCCM/MECM, SmartDeploy, PXE Boot, imaging, workstation/laptop/thin-client deployment, patching, VMware, asset inventory and lifecycle management
IT Support & Operations:	Tier 1/2 support, hardware/peripherals, printers, POS/kiosks, remote support, ServiceNow, Remedy, BeyondTrust/Bomgar, SLAs, SOPs, vendor coordination, equipment logistics
Automation & Data:	PowerShell, Python, Bash, SQL, JavaScript, Java, C++, Power BI
Security & Networking:	Endpoint protection, least privilege, access control, security patching, HIPAA/Privacy Act handling, VLANs, switches/access points, basic firewall troubleshooting

PROFESSIONAL EXPERIENCE

IT Support Associate II, Operations Technology
Jul 2026 - Present

Amazon | South Jersey, NJ

- Provide Tier 1/2 technical support for 300+ operations technology endpoints across multiple buildings, including workstations, scanners, network printers, kiosks, and related peripherals.
- Own endpoint allocation, maintenance, troubleshooting, and lifecycle activities while coordinating with facilities and network teams to restore service within SLA.
- Support remote users and cross-building requests in a fast-paced, round-the-clock operations environment where technology availability directly affects site productivity.
- Document recurring issues and contribute SOPs and knowledge resources that improve consistency and speed future resolution.

IT Support Technician
Mar 2025 - Aug 2026

Shoppers World & Forman Mills Corp | South Jersey, NJ

- Delivered on-site IT support across multiple retail locations, covering POS systems, network switches/access points, printers, and back-office hardware.
- Diagnosed hardware, software, and connectivity issues and closed 500+ tickets through corporate support workflows.
- Maintained loaner equipment and coordinated third-party vendor repairs to reduce downtime during hardware replacement and recovery.
- Supported equipment rollouts and new register/kiosk installations, partnering with corporate IT on schedules, escalations, and site readiness.

HANS SAI

IT SYSTEMS & OPERATIONS PROFESSIONAL

PROFESSIONAL EXPERIENCE - CONTINUED

IT Systems Administrator | Health Services Administrator

Jan 2021 - Present

U.S. Air Force Reserve - 87 MDG / 514 AMDS | JBMDL McGuire, NJ | Part-time / concurrent

- Administer Active Directory for user provisioning, account unlocks, and Group Policy enforcement across a secure medical network.
- Reimaged and deployed 150+ computers using SmartDeploy and PXE Boot and decommissioned 150+ legacy systems to maintain operational and compliance standards.
- Resolve 12-15 Level 2 support tickets daily (1,000+ annually), including system crashes, connectivity problems, Active Directory access, printers, and endpoint issues.
- Built a QR-code-based clinic tracking system and an encrypted records workflow that improved patient check-in while protecting sensitive data.
- Maintain HIPAA- and Privacy Act-aligned records processes and compile staffing, workload, and records-volume reports used for planning and resource decisions.
- Trained 80+ personnel on emergency response and readiness-tracking procedures supporting deployment operations.

Organization Technology Pro | Department Manager

Sep 2019 - Mar 2025

McDonald's | Fredericksburg, VA & Medford, NJ

- Provided frontline technology support for POS systems, kiosks, printers, routers, terminals, and mobile payment devices across two high-traffic locations.
- Installed, configured, and maintained restaurant technology and reduced technology downtime 25% through proactive maintenance and faster issue response.
- Managed scheduling, payroll, and inventory for a 15+ person crew and reduced scheduling conflicts 30% through improved forecasting and operating discipline.
- Trained staff on POS troubleshooting and collaborated with corporate IT and regional managers to align local operations with broader support processes.

EDUCATION

B.S., Computer Science - Cybersecurity Focus

Liberty University, Lynchburg, VA | May 2026

A.A.S., Health Information Technology & Services Management

Community College of the Air Force | 2021

CERTIFICATIONS & CREDENTIALS

CompTIA Security+ (Active) | Active DoD Secret Clearance | CompTIA IT Fundamentals+ | Microsoft Technology Associate (MTA) | Air Force Continuous Process Improvement & Six Sigma Green Belt | Basic Life Support (BLS) & CPR Certified

SELECTED TECHNICAL WORK

AD & Endpoint Automation Toolkit

PowerShell tooling for user provisioning/offboarding, stale-account cleanup, and endpoint compliance auditing with safe -WhatIf support, logging, and CSV reporting.

Helpdesk Ticket Analytics

Python reporting workflow that turns support-ticket exports into SLA compliance, resolution-time, and backlog-aging metrics with an HTML report.

Log Correlator SIEM

Python-based event correlation that groups related security events into higher-confidence incidents and maps detection rules to MITRE ATT&CK techniques.

JotRelay

Real-time encrypted collaborative notepad/PWA with shareable links, QR codes, presence, typing indicators, offline drafts, and OS-level share support.
